fourgee | Oroboros

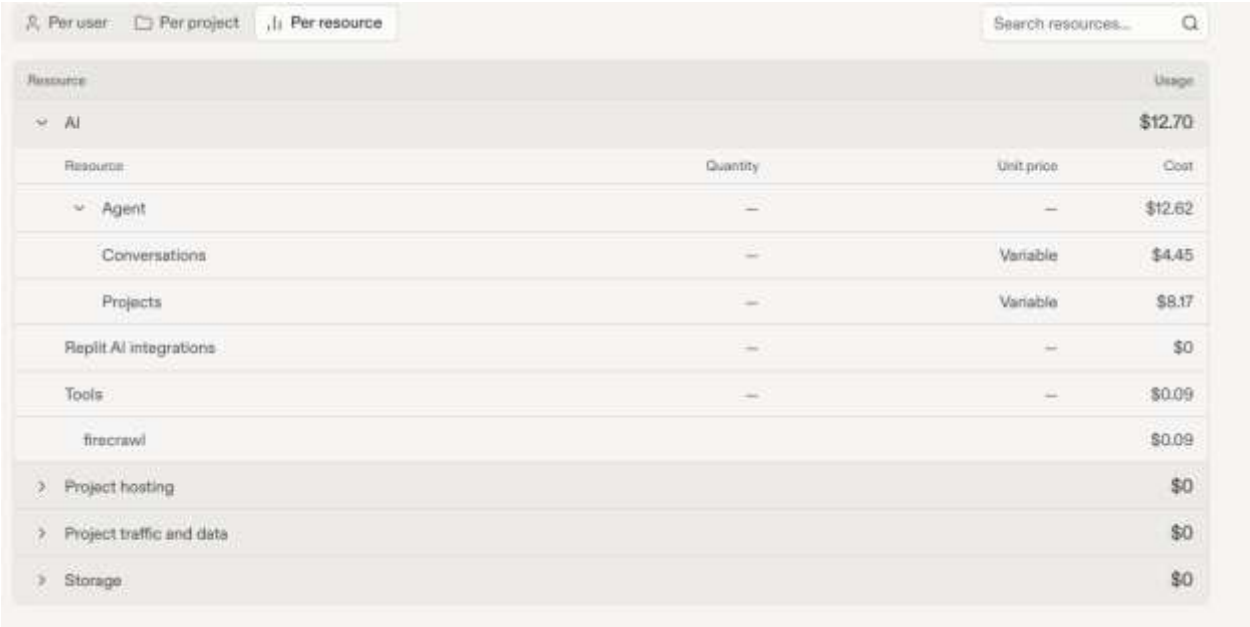

Replit proof of use · 25 October 2026

Actual use: submission documentation, a timed pitch/demo script, and creation of a nine-slide pitch deck with PDF export. The application itself is hosted on GitHub Pages, not Replit. The following pages retain the supplied usage screenshot and show two slides captured from the running Replit presentation.

Figure 1. Cover slide captured from the running Replit deck. Screenshots demonstrate the presentation output; the supplied usage screenshot on the next page records account activity, not a claim that all account spend belongs to this project.

Pitch deck created in Replit

Figure 2. Technical-approach slide captured from the running Replit presentation. The deck contains nine slides with presenter notes for a six-minute pitch. Output: SDC2026_fourgee_Oroboros_Pitch.pdf.

RunPod was not used. The team reports that the administration confirmed it is not required because this project has no GPU workload. No sponsor-funded credits or Replit app-hosting claim is made.
